About Me

Greetings! I am a dedicated Computer Science student at Bina Nusantara University, specializing in Database Technology. I have developed strong proficiency in various programming languages and possess effective communication skills in three languages. With a proven track record of leading teams to success across diverse projects, I bring strong leadership abilities to every collaboration. My passion for continuous learning and teamwork makes me well-suited for dynamic and fast-paced environments. I am currently seeking internship opportunities to further enhance my skills in Data Analysis and Web Development.

Experience

2024 Feb - 2024 June

Binus University

Application Developer

- Engineered a predictive machine learning model to forecast flood patterns, enhancing disaster preparedness efforts.
- Developed an interactive data visualization dashboard to streamline analysis and reporting processes.
- Authored a comprehensive research paper on advanced predictive analytics techniques.
- Proficient in using Python and R for data analysis, visualization, and predictive modeling.

2024 July - 2025 Feb

KodeKiddo

Coding Instructor

- Taught coding to students from kindergarten to high school levels, adapting lessons to various age groups and skill levels.
- Led extracurricular coding programs in schools, fostering interest in technology and digital literacy.
- Delivered engaging STEM lessons that combined science, technology, engineering, and math concepts through hands-on activities and projects.
- Served as a Coding Instructor at KodeKiddo, inspiring young learners to explore programming and problem-solving skills.

Education

2018 - 2021

SMA Kristen Kalam Kudus

2021 - 2025

Binus University
